California Proposition 65

Some metal products may contain elements or chemicals known to the State of California to cause cancer, birth defects or reproductive harm. These elements include but are not limited to Lead, Nickel, Cobalt, and Silica. For more information visit: www.P65Warnings.ca.gov.

California law requires businesses to provide a clear and reasonable warning to customers purchasing products in the state of California before knowingly or unintentionally exposing them to one of 1000+ listed chemicals or elements. This warning is required when a business is aware of or believes one or more of these listed chemicals or elements may be present in their products.

Fluid Power Energy, Inc. products can contain Prop 65 chemicals, but simply because a component is subject to Prop 65 does not mean a warning on/with the finished printed product is required. Fluid Power Energy, Inc. products typically contain Prop 65 chemicals that are volatile in nature or do not pose an exposure risk in the finished product.

Further to this, warning requirements are dependent on the anticipated level of exposure to the Prop 65 chemicals, which result from the foreseeable uses of a product. The warning requirements will only apply if the foreseeable and intended uses of a product containing these chemicals are likely to result in exposures that exceed the "significant risk" or "observable effect" levels. A determination of "significant risk" or "observable effect" can only be made with full knowledge of the end uses and applications of the products. Fluid Power Energy, Inc. does not control or have knowledge of the end uses of our products. Fluid Power Energy, Inc., therefore, cannot make any guarantee regarding the actual exposure levels to the Prop 65 chemicals. Fluid Power Energy, Inc. recommends companies review the Prop 65 regulation to determine their appropriate methods and requirements for compliance concerning Prop 65. The decision to include or not include a Prop 65 notice (label) must ultimately rest with the company using Fluid Power Energy, Inc. products.

If you require additional information or have concerns about these products, please call us. This notice serves as "reasonable warning" to our customers as required by California law, about the potential hazards of using or working with industrial metal products. Your decision to purchase these products acknowledges your understanding of these warnings and acceptance of possible health risks.
